# MIETEN: WHAT DOES OUR CUSTOMERS SAY?

## I. Customers Testimonials

Mieten is extremely light. It does not cause the load on the phone I used it with. This is an amazing factor why I will not uninstall this application. Also, I have been looking for such an opportunity where I could utilize such a placement app instead of hunting for the jobs and placement opportunities on the vast internet. This application is handy. Thanks a lot.

- **Ayushi Goel**

One of the salient features of this app is that is does not crash too often, as of the other apps I have used so far. Interestingly, even when the activity is dormant behind, i.e. at the background, my phone still manages to have a free RAM of approximately 960 MB, which is wow. This app is not a performance compromise and is not a overhead for storage. Highly Recommended.

- **Viharika Readdy**

Initially I thought that the application is just a waste of space and performance burden until my friend recommended to this Mieten, developed by our seniors. This mobile app is extremely user friendly, the features are as expected. I loved the sample papers sections wherein previous year's content or the material is present for future preparations of any job interview or placement related exam. This feature is missing in most of the placement or job related web portals. Nice Initiative.

- **Anupam Nagpal**

I saw the app, the layout is pretty lovely! Although it's just a prototype application, it has many interesting features. The admin can response to the questions asked, is what I found most useful. It sometimes becomes urgent to ask the questions but is not always feasible to walk all the way through the collage to the placement cell and ask the questions manually. Since this application, also called Mieten, incorporates these features into it, I guess it will be widely used among the NU community and will see success ahead very soon.

- **Katragadda Akash**

This application is definitely going to resolve the placement related issues of NU placement cell. For small work even, one had to rush to the office and the Placement cell of the NU, which at times does not serve the purpose even. As per my opinion over Mieten, developed by our seniors, I would like to acknowledge that I am pretty much impressed by this application. I must appreciate the initiative that such an industry ready app has been launched at NU. The prototype itself is so attractive that anyone would fall for. I checked into the student's side and discovered that the interface is so easy. This app does not lag and therefore, is pretty much what exactly the students of NU needs. Highly recommended.

- **Sakshi**

Although the app is nice, yet it has many missing features, for example the test papers, which are present under the student's section for download, are scattered. There must be some discipline wise segmentation which should have been done in order to make it more systematic. I found one more thing, that in the preference section, anyone can go for any internship. Although it is recommended yet it is non desirable. A non-techie must always look for relevant jobs into his home's section and shouldn't be allowed to go for other options. I guess there should at least be some kind of restriction. Rest the app is fine as of now.

- **Isha Pali**

When someone asks me, which is the best app in your phone? I'll respond with Mieten. This application has made my live easier. All the placement related things in one place, which hassle free mode of handing. You can apply for jobs or internships, you can practice questions with uploaded sample papers, are the two things what a college student needs. It gives more power to admin where he can monitor students with incomplete info or students who haven't uploaded their resume yet. The most attractive feature of the app is the FAQ part. Also, this app updates the students about the latest industry collaborations which going through NU's official site, saving the trouble of typing everything into google. Although prototype, excellent app. Recommended.

- **Mrinal Sharma**

Being a 3rd year student of NIIT University, I found out about Mieten very recently and I just wanted to say that it's a very, very helpful initiative. I am sure you get hundreds of mails everyday inquiring about internships, well I thought you might like a 'Thank you' mail amidst of all those. Trust me when I say out of all the startups I have come across only this one made me write this e-mail. Congratulations and thank you!

- **Praveen Kumar**

Team Mieten is really doing a great job to help the students all over NU. It's really cool and also offers the best learning experience. Even the contests you put up help in exploring the skills of an aspirant at its best. I'm really honoured to be a part of it. Keep up the good work. All the very best Team Mieten! Thank you for this wonderful application.

- **Mohit Singh**

I have been heading about Mieten for a long time now. I just read the last few lines of the about section and they made me feel really thankful, when I saw the prototype was ready. Mieten is one of the best application I saw. I am still looking for a six-month internship and your help is a big boon. I am really grateful for this awesome work. Hope it becomes functional too.

- **Priyadesh Panday**

I am a II$^{nd}$ year student at University of Delhi. I was introduced with Mieten from our seniors, and found it very useful for college students. Thanks so much for such a wonderful Moblie Application!

- **Hitin Jami**

Heartly Congratulations for creating such a big repository of information. It has really helped engineering students like me who are from colleges with no reputation or strong peer group and lack of guidance. Even though I haven't got internships as of yet, but still at least now I know that there is some information about internships available to me via Mieten and I can look forward to get this application prototype fully functional someday. Thank you, great job, keep it up.

# II. Feedback from Minutes of the Meetings Conducted

**a. Meeting 1: 20$^{th}$ September 2017**

Meeting with Mr. Jaffar Ansari was organised. He liked the idea and asked us to go ahead with the project idea and pitch the same to Ms. Geetica Rastogi. Use cases and a few requirements were collected. He focussed on the admin side privileges of the app. Further, Team Mieten was asked to arrange meeting with Ms. Geetica Rastogi.

**b. Meeting 3: 5$^{th}$ October 2017**

Meeting with Ms. Geetica Rastogi. Following Feedback was recorded.
- She asked to include the student and admin login in one page
- She gave her requirements.
- She asked us to take up this idea to Mr. Akhilesh Agarwal.

**c. Meeting 2: 6$^{th}$ October 2017**

Meeting was arranged with Mr Akhilesh Agarwal. Following Feedback was recorded.
- To make proper table structures in our database.
- To perform requirement analysis
- To improve UI of our app. He asked us to keep it simple and easy to use.
- In the database, connect the tables properly, normalize them to reduce redundancy.
- To Use MySQL Database instead of firebase.
- He helped us to connect different aspects of our project by providing a flow diagram.

**d. Meeting 3: 25$^{th}$ November 2017**

Meeting with Mr. Jaffar Ansari. Following Feedback was recorded.
- The app was handed over to the facilitator for testing.

- ➢ While testing the app, we got some feedback to add some extra features required by the CIIC.
- ➢ We discussed in detail about the possibilities of adding any feature compatible with our app.
- ➢ We were being told the current scenario and the details nowadays required by most companies, so that it can get integrated with the app.
- ➢ The facilitator appreciated the work done till now, and lauded us to continue with the refining of our product's features.
- ➢ The session ended with getting a feedback form filled by the facilitator.

### e. Meeting 3: 27th September 2017

Meeting with Ms. Geetica Rastogi. Following Feedback was recorded.
- ➢ Add background notifications feature.
- ➢ Display sample papers differentiating in terms of technology, rather than displaying all at once.
- ➢ Personalize the preferences available with respect to the stream of the student.
- ➢ Add option to disable the company inserted from admin side.
- ➢ To change the app background after signing in.
- ➢ Give field to add link to digital portfolio.
